WORK EXPERIENCE

Software Engineer

Cloud Angle Digital Transformation

(Client: FIS Global)

May 2023 – April 2024 | Hyderabad | India

Achievements/Tasks

- Worked on enterprise-level US Credit Card Migration project for FIS Global
- Performed application enhancement, validation, and defect resolution
- Collaborated with cross-functional teams (QA, testing, release teams) to ensure smooth application deliver
- Involved in code migration, validation, and defect resolution during system transition
- Worked in Linux/Unix environments and handled batch processing workflows
- Supported production deployments and validated application functionality post-release
- Used Jira for defect tracking, task management, and Agile sprint execution
- Gained exposure to release lifecycle, environment management, and deployment processes

PROJECTS

DEVOPS PROJECTS (Hands-on Experience)

(May 2024 – Present)

CI/CD Pipeline Implementation (AWS + Jenkins + Docker)

Reduced manual deployment effort and improved release efficiency
Built end-to-end CI/CD pipeline using Jenkins
Automated build, test, and deployment process
Dockerized application and deployed on AWS EC2
Integrated GitHub for continuous integration
Reduced manual deployment effort and improved efficiency

Kubernetes Deployment Project

Containerized application using Docker
Deployed application on Kubernetes (Minikube / EKS)
Configured services and load balancing
Managed scaling and ensured high availability

EDUCATION

B.Tech (Computer Science Engineering)

Veer Bahadur Singh Purvanchal University

2018

jaunpur, India

SKILLS

Terraform

Aws DevOps

Kubernetes

Docker

Linux

Github

Aws

Grafana & Prometheus

ELK

Jenkin

AWS EC2,S3,IAM

ServiceNow

Version Control : Git

Python (baic)

CERTIFICATIONS

AWS Certified Solutions Architect – Associate (In Progress)

PROJECTS

Infrastructure Automation using Terraform

Provisioned AWS infrastructure (EC2, S3, IAM) using Terraform

Implemented Infrastructure as Code (IaC)

Automated resource creation and configuration

Improved consistency and reduced manual setup errors

Monitoring Setup (Prometheus & Grafana - Basics)

Set up monitoring for containerized applications

Configured dashboards for performance tracking

Gained understanding of observability and alerting

CAREER TRANSITION & UPSKILLING

Completed of DevOps training (Tutodude platform)

Built multiple real-time projects using AWS and

DevOps tools

Continuously practicing cloud deployments and automation.

ADDITIONAL INFORMATION

Strong interest in Cloud & DevOps technologies

Quick learner with hands-on problem-solving approach

Available for immediate joining

GitHub Project (github.com/noormohammad161996-cloud)

End-to-End DevOps Pipeline Project

→ Integrated GitHub, Jenkins, Docker, and AWS

→ Implemented complete CI/CD workflow from code commit to deployment

TOOLS / PLATFORMS

EC2, S3, IAM, VPC, Github, Jira.
